### SOLID STATE TIMER, HIGH POWER

**TH3XM Timers**

TH3XM series solid state timers deliver reliable performance in high power applications, with a heat sink that spans the entire base of the unit.

TH3XM timers provide Delay on Break function and offer four time setting options: adjustable via integral or external pot, factory fixed internal, or fixed via external resistor.

Set variable time periods from 0.1 second up to 1000 seconds, for any range up to 24 hours. Specify fixed time periods in full seconds or hours.

**Delay on Break**

Input voltage is applied continuously. Upon closure of the normally open isolated external switch, the load is energized, and remains energized as long as it is closed.

When the external initiate switch opens, the time delay is started.

At the end of the time delay, the load is de-energized, and the timer is ready for another cycle.
