TGCB-E Timers
TGCB-E timers with dipswitch adjustment offer precise timing accuracy in a compact 2.5” x 2.5” encapsulated configuration.
Three time ranges are available: 0.1 to 102.3 seconds, 1 to 1023 seconds and 10 to 10230 seconds. Available with relay output ratings of 6, 10 and 20 amps.
Our advanced circuitry provides this timing module with unsurpassed accuracy and reliability. The TGCB-E relay common is internally connected to (+) or hot.

Timing Mode
Application of input voltage to the timer starts the time delay. At the end of the delay period, the load is energized. To reset, remove the input voltage to the timer.
