**TH3XL Timers**

TH3XL series solid state timers deliver reliable performance in high power applications, with a heat sink that spans the entire base of the unit.

TH3XL timers provide Interval On Delay function and offer four time setting options: adjustable via integral or external pot, factory fixed internal, or fixed via external resistor.

Set variable time periods from 0.1 second up to 1000 seconds, for any range up to 24 hours. Specify fixed time periods in full seconds or hours.

**Interval On Delay**

Application of input voltage to the timer energizes the load and starts the time delay.

At the end of the time delay, the load is de-energized.

Removal and re-application of input voltage resets the timer.
