

CUSTOM SOLUTION

AIROTRONICS
Timers and Controls **ACT**

A division of Pelco Component Technologies

MARKET:

Food Service Equipment

FUNCTION: This electronic defrost timer is a recycling timer providing direct control of both the cooling compressor and the defrost heater, accomplished at preset timed intervals. This control eliminates the need for separate relays or contactors. A user-accessible push-button switch is provided to initiate a manual defrost. An LED illuminates to indicate a defrost cycle is taking place.

PURPOSE: The control is used to provide an accurate method of defrosting refrigeration equipment. The control is ideal for commercial refrigeration applications where mounting space is limited.

GROWTH MARKET: HVAC

PELCO
COMPONENT TECHNOLOGIES
Putting Power to Work

2747 Rte 20E Cazenovia, NY 13035
www.pelcocaz.com

CATEGORY: Microprocessor

APPLICATION: Defrost Timer

SERIES: MC

FEATURES:

Two high-power outputs (15 and 20 amp) for compressor and heater

LED indicator for defrost mode

Adjustable or fixed time settings.

Compact size

Non-metallic case with ¼ inch terminals

Transient protected

100% load isolation

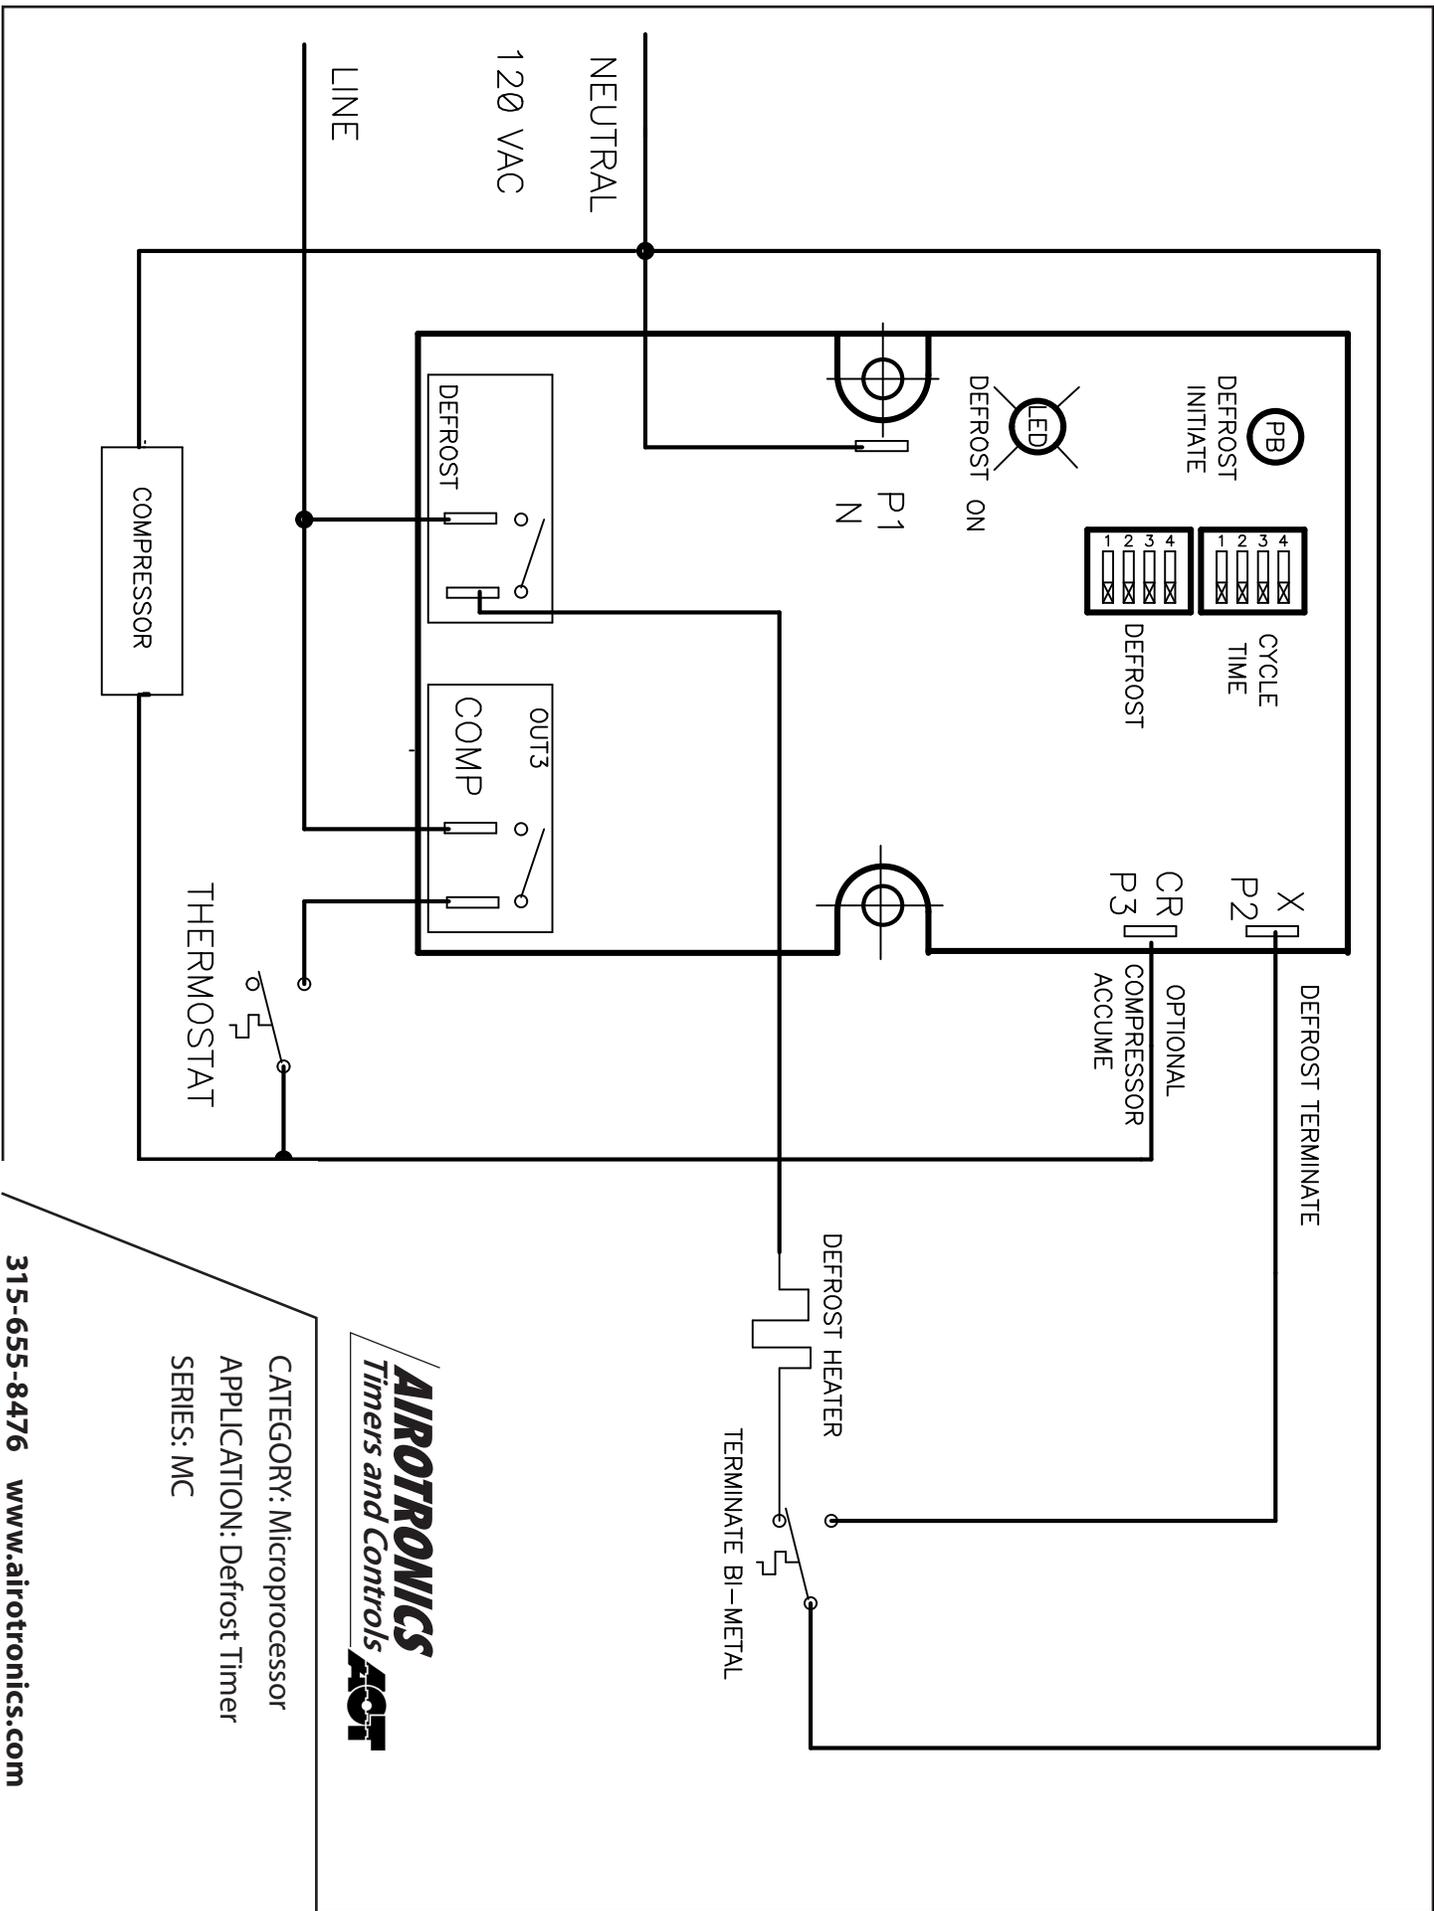

No leakage in N.O. position

No heat sinking required

Totally encapsulated for protection from harsh environments

100% operational testing before shipping

UL / CSA approvals
