

CUSTOM SOLUTION

AIROTRONICS *Timers and Controls* **ACT**

A division of Pelco Component Technologies

MARKET: Shop Tools

FUNCTION: This TG custom control is a safety device for table saws or other shop tools. The control will not allow the motor to restart after a power loss if the control switch is still closed. The 30 amp relay can control a motor directly without separate contactors.

PURPOSE: Safety devices for shop tools and power equipment to ensure operator safety in the case of power loss and sudden restarts.

GROWTH MARKETS: Appliances, Safety Devices

CONTACT: 315-655-8476
